Open University Press. Paperback. Book Condition: New. Paperback. 272 pages. Dimensions: 9.3in. x 6.7in. x 0.8in. Its . . . an excellent piece of work which will help anyone who is prepared to learn about the most effective manner of organising and presenting information. Roy Johnson 2009 Mantex Information Design . . . this is one of the best handbooks on how to manage continuously the handling of information throughout the whole process of formulating initial hypothesis towards the end product the dissertation. . . Simonas Daukantas Vilnius Information Research August 2009 This is a very engaging book on research that, unusually, covers the neglected but strategically important information and knowledge aspects of the research process, including writing, designing and dissemination. It is also unusual in that the authors talk personally to the reader (lots of practical advice offered), and for the real conversations it furnishes from practising and recent researchers. It makes a very welcome change from those stereotypical research methods books that seem only ever to tell you what you already knew in a remote, formalistic and repetitive fashion. By contrast this book is fresh, interesting, fills a real gap in the research literature and the authors passion for quality research is there for everyone to see. Professor David Nicholas, Director, School of Library, Archive and Information Studies, and UCL Centre for Publishing, University College London. I was delighted when I discovered this treasury of useful advice and insight, and I recommend it to my research students. The book is based on interviews with real research students (who are quoted at length), so it offers the solidarity of a shared experience, not just a lecture. The authors understand the difficulties that students face as they try to organize their thoughts, their time, and the inevitable mountain of data...
