

## The Plant World, 1910, Vol. 13: A Magazine of General Botany January, 1910 Heredity in Populations and in Pure Lines (Classic Reprint)

By L R Waldron

Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Excerpt from The Plant World, 1910, Vol. 13: A Magazine of General Botany January, 1910 Heredity in Populations and in Pure Lines The results in this case are markedly different from those secured when the material was studied as a population. Here we do not have a fine example of regression as is shown in Figs. 1 and 2. It must not be forgotten that both Figs. 2 and 3 represent the facts, but in Fig. 3 the data are so presented that we see the sequence of the two related means i.e. (means of mother and daughter classes) in the various cases. There is evidently a certain amount of regression expressed in the table, but apparently little can be learned from it in regard to the value of selection. Studies Of Relative Width. Studies were also made upon the relative width of bean seeds. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. ### Reviews

*This is the finest book i have got study right up until now. I am quite late in start reading this one, but better then never. Once you begin to read the book, it is extremely difficult to leave it before concluding.*

-- **Keanu Johns**

*This is the finest book i have read until now. It is filled with wisdom and knowledge You can expect to like just how the author compose this ebook.*

-- **Tobin Lesch**
