Createspace, United States, 2014. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. This is in black and white. This book shows how and also why the solar forms. This is nature. The law is that the distances of the planets from the sun, is based on the numerical sequence 0, 3, 6, 12, 24,48. By adding 4 to each number and then by dividing by that number by 10 gives the sequence of 0.4, 0.7, 1, 1.6, 2.8,5.6, which is a representation of distances in astronomical units for planets. I explain why we start with the number 3; that I explain, why we have to add 4, the number 4 this I explain and why we then have to divide by 10 the number 10 this too I explain. I explain in precise detail why the planet distances from the sun doubles every time. Moreover I explain what effect this has on gravity. This has never been achieved before. I took this back also to prove how the Universe started and why Jupiter is so much bigger than all the other planets. From information gained by using the Titius Bode law I read what happened in the solar system as the solar system developed. I explain how this law in conjunction with three other laws form gravity and how this affects all of us on earth in experiencing gravity. The Titius Bode Law is deciphered for the first time ever but you don t know what the Titius Bode law means because science has been hiding this law for 250 years out of plain sight. Since 1776 not one in science pursuit to find an explanation about the Titius Bode law.If you don t believe me find out what the Titius Bode law is....
