

Improvement Era, Vol. 7: December, 1903 (Classic Reprint) (Paperback)

Filesize: 1.96 MB

Reviews

An exceptional ebook and also the typeface applied was intriguing to read through. I have got read and i also am sure that i am going to likely to go through yet again once more in the foreseeable future. I discovered this pdf from my dad and i advised this ebook to find out. (Dr. Raven Ledner)

IMPROVEMENT ERA, VOL. 7: DECEMBER, 1903 (CLASSIC REPRINT) (PAPERBACK)**DOWNLOAD**

Forgotten Books, United States, 2018. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from Improvement Era, Vol. 7: December, 1903 Of equal value as a fundamental principle of nature with the law of the persistence of matter is the law of the Persistence of Force or Energy. A great variety of forces exist in nature. As, for instance, gravitation, electricity, chemical affinity, heat and light. These forces may all be made to do work; and energy, in fact, may be defined as the power of doing work. In early days these forces were supposed to be distinct and not convertible, one into the other, just as gold and silver, with our present knowledge, are distinct and not convertible into other elements. As will be shown in the fourth paper of this series, students of light and heat began to demonstrate in the early part of the nineteenth century, that these two natural forces were different manifestations of one universal medium. This in turn led to the thought that possibly these forces, instead of being absolutely distinct, could be converted one into the other. This idea was confirmed in various experimental ways. Sir Humphrey Davey, about the end of the eighteenth century, rubbed together two pieces of ice until they were nearly melted. Precautions had been taken that no heat could be abstracted from the outside by the ice. The only tenable conclusion was that the energy expended in rubbing, had been converted into heat, which had melted the ice. About the same time Count Rumford, the distinguished American, was superintending the boring of a cannon at the arsenal at Munich, and was forcibly struck with the heating of the iron due to this process. He, like Davy, believed that the...
