Createspace Independent Publishing Platform, 2017. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****.A Theory of Modern Business Law Mark Boler sets forth are those that free and rational persons would accept in an initial position of equality. In this hypothetical situation, which corresponds to the state of nature in social contract theory, no one knows his or her place in society; his or her class position or social status; his or her fortune in the distribution of natural assets and abilities; his or her intelligence, strength, and the like; or even his or her conception of the good. Thus, deliberating behind a veil of ignorance, people determine their rights and duties. The first, theoretical, section of the book addresses objections to the theory and alternative positions, especially utilitarianism. The author then applies his theory to the philosophical basis of the constitutional liberties, the problem of distributive justice, and the definition of the ground and limits of political duty and obligation. He includes here discussion of the issues of civil disobedience and conscientious objection.
