Using pre-sedimentation tank to
mitigate high turbidity
in water treatment plants

Condition: New. Publisher/Verlag: Noor Publishing | in water treatment plants | There is a critical shortage of potable water in Khartoum State and the situation is exaggerated during the flood seasons. The most important challenge facing Khartoum State water supply sector- during the flood season- is to provide Khartoum's inhabitants with reliable and safe drinking water free of pathogenic and harmful chemical substances to have acceptable limit of turbidity. The other challenge that faces Khartoum State Water Corporation (KSWC) is...
