

Manual for Short-term Psychoanalytic Child Therapy (PaCT) (Paperback)

By Tanja Gottken

Taylor Francis Ltd, United Kingdom, 2013. Paperback. Condition: New. Language: English . Brand New Book. Manualisation of psychodynamic psychotherapy poses a formidable challenge, but may prove indispensable in the effort to disseminate short-term psychodynamic treatments to a wider patient community. In the case of childhood emotional disturbances, the need for widely available treatments is particularly pressing especially once we pay heed to the emotional turmoil also underpinning many behavioural problems. Short-term Psychoanalytic Child Therapy (PaCT) is an emotion-oriented, play-focused treatment that aims to help the child to relinquish rigidly held maladaptive defence mechanisms that give rise to symptoms and interfere with healthy development. PaCT comprises twenty to twenty-five psychotherapeutic sessions conducted in alternating settings (parent-child, child alone, parents alone), in which a relational theme is uncovered and worked through. Here, the authors have created a manual for PaCT, successfully retaining the complexity of each treatment whilst making the application accessible for a greater range of settings. This manual will be of use to trainees and practising therapists alike.

Reviews

An exceptional publication as well as the font applied was intriguing to learn. It usually does not charge an excessive amount of. Its been designed in an exceedingly basic way and it is just after i finished reading through this book through which in fact altered me, modify the way in my opinion.

-- **Haylee Hackett**

It in a of the best ebook. It generally is not going to expense excessive. It is extremely difficult to leave it before concluding, once you begin to read the book.
